[www.weg.net/us](http://www.weg.net/us)

**MARCH 14<sup>th</sup>, 2011**

We herewith declare under sole responsibility that the energy efficiency levels of the three phase induction motor described on the Commission Regulation EC No 640/2009 – Directive 2005/32/EC, which states the following motor features:

- Rated voltage up to 1000v;
- Rated output between .75kw and 375kw;
- Either 2, 4 and 6 poles;
- Rated basis of either duty type S1 (continuous duty) or S3 (intermittent duty) with a rated cyclic duration factor of 80% or higher;
- Capable of operating direct on line;

The model 00518ET3E184TC-W22, which includes such features, manufactured by WEG Equipamentos Electros S.A., meet the minimal energy efficiency levels defined in the Standard IEC 30064-30 – Rotating electrical machine – Part 30: Efficiency classes of single-speed , three phase, cage induction motors.

Sincerely,

**Michael W. Parsell**  
LV Application Engineer  
WEG Electric Corp.
